Simple Four Stage Process

In a new leadership role, there are many questions from the new leader and team. Accelerate Your Leadership will accelerate getting to know the team and improve delivery at pace

Stage 1

Leader & Coach

Leader and coach meet to discuss the initial findings and expectations of the new leadership role.

Leader identifies questions to ask the team to accelerate relationship building and to explore how the team is operating.

Stage 2

Team & Coach

Team and coach meet in person or virtually. Coach will ask the team questions and record responses anonymously.

All views shared are non-attributable, but will be shared with the leader to accelerate delivery.

Stage 3

Leader & Coach

Coach shares all views from the team in response to all topics, highlighting themes.

Coach will explore with Leader ways to respond and how the information shared links to Leaders plans for the future.

Stage 4

Leader, Team & Coach

Leader meets with Team to share themes and future focus actions to accelerate delivery for the team and wider business. Coach is present.

Should further coaching be required, this will be agreed separately.

What would you ask?
